Thank you, Colleen, we received a copy earlier this week and have a meeting set up with Phil to see what we need to do to address the issue since it looks like one of the facilities is in the out of the PM10 nonattainment area and the other is outside the PM10 nonattainment area but located in Area A. The rules as written for the AgBMP are for sources in the PM10 nonattainment area, so there appears to be a regulatory gap.

Tim
